

# Homeowner's Potential Contaminant Inventory

## Contaminants in Your Home

Many common products or equipment that may be found in the home can become a potential contaminant if handled or disposed of improperly. Take a general inventory of potential contaminants in your home, and help protect the groundwater! **Never dispose of these materials into a septic system or on the ground.** Read the label carefully for disposal directions and dispose of hazardous materials at HazBin. Other items may be disposed of in the regular trash, if precautions are taken. (See WHPP 918 and WHPP 918.) Check the items below that may be found in your home:
