Re: Backflow Prevention Device Installation – **90 Day Notice**

Louisville Water’s Cross-connection Control Program requires that a **backflow prevention device must be installed** to protect the water quality in the public distribution system. Louisville Water performed a cross-connection control risk assessment and identified the need for protection on the following meter:

Account #: [Redacted]  
Meter #: [Redacted]

**\*\* If this meter serves a commercial or industrial water service**, please contact your plumbing contractor.

**\*\* If this meter serves an irrigation service**, please contact your irrigation contractor.

**Please contact your contractor to install a backflow prevention device and submit test report results within 90 days from receipt of this notice to one of the following:**

Mail: Louisville Water Company  
550 South 3rd St.  
Louisville, KY 40202  
Attn: Cross-connection Control Program

Email: [crossconnection@lwcky.com](mailto:crossconnection@lwcky.com)  
Fax: 502-569-0848

The customer is responsible for all costs associated with the installation and testing. If you have any questions please visit our website at:
