

HOW TO USE YOUR WATER FILTER PITCHER

Louisville Water is giving you this water filter because we have significantly disturbed your water service line or because we have detected lead in your drinking water.

Use the water filter pitcher for drinking and cooking. You do not need to use this pitcher for non-consumption uses of water, such as showering, laundry, washing dishes or cleaning.

- ✓ Following EPA guidance, Louisville Water recommends that you use a filter for all cooking and drinking water for 6 months after a lead or galvanized service line has been replaced or other significant disturbance has occurred.
- ✓ Use of this water filter pitcher does not reduce the need to follow the flushing procedures provided by Louisville Water. Flushing your pipes is extremely important! Visit LouisvilleWater.com/Flushyourpipes.
- ✓ Follow the manufacturer's instructions for operation of the filter pitcher and replacement of the filter element. Louisville Water is providing a filter pitcher and additional filter cartridges which is estimated to provide 6 months of drinking and cooking water. Additional filters for extended use are to be supplied by the customer.
- ✓ The filter provided is NSF approved for lead reduction. Louisville Water does not and hereby expressly disclaims any warranties applicable to the performance of this filter. If you have questions regarding the manufacturer's specifications for this filter, please visit the manufacturer's website for questions or concerns.
- ✓ For more information, please visit LouisvilleWater.com/lead-awareness or contact leadproject@LouisvilleWater.com or (502) 569-0898.
- ✓ You can also scan this QR code for more information about flushing your water lines.
